- **Location:** Hyderabad, India
- **Professional:** <https://www.linkedin.com/in/harsha-praneeth-446b1736b/>

Objective

Highly motivated 1st-year Computer Science Engineering (CSE) student seeking a Software Development Internship. Possessing strong foundational skills in Python and front-end development (HTML, CSS, JavaScript) acquired through rigorous self-study and practical application. Proven ability to learn rapidly, demonstrated by successful hackathon participation and self-initiated projects. Eager to contribute immediately and gain professional experience.

Technical Skills

| Category | Skills |

| Languages | Python, JavaScript, HTML5, CSS |

| Frameworks/Libraries | Tailwind CSS, Bootstrap |

| Tools & Platforms | Git, GitHub, VS Code, Base 44 AI (Application Experience) |

| Concepts | Responsive Design, Rapid Prototyping, AI/ML Application Integration |

Languages

- English (Fluent)
- Telugu (Native)

Projects & Achievements

Base 44 Hackathon Participant

- Developed and successfully presented a working application utilizing the **Base 44 AI** platform.
- Gained hands-on experience in integrating AI/ML functionalities into a functional application under rapid prototyping constraints.
- <https://quick-gig-copy-cb871498.base44.app>

Ideathon Participation

- Participated in a technical ideathon, focusing on conceptualization and strategic development of innovative solutions.
- Enhanced skills in structuring complex technical ideas and presenting feasibility analysis.

SmartFarm Website (Self-Initiated Project)

- Designed and developed a fully functional, responsive website utilizing core **HTML** and **CSS** principles.
- Project was completed just three months into the engineering program, demonstrating commitment to immediate practical skill application.
